BuildEasy v1.31 - Release Notes

14th March 2024

Enhancement

- **CCUW-33** - Site Entry pop should not appear on certain pages. Made it configurable at page level for all sites to hide the Site Entry modal at specific pages.
Authoring guide URL: <https://buildeasy.bms-preview.com/author-guide/home/page-properties/general.html>
- **LW-4** - When user clicks sign up and gets taken to the pending verification page, they are taken to the bottom of the page. Fixed the scroll on registration form submit.
- **COMM-1856** - Wallet Card Functionality: Enhancement.
- **COMM-1886** - Update frontend webshop cart object in Manual webshop. Update the mentioned properties in JSON object.
